

WANT TO ENROLL IN ESM 482 WITH THE OFFICE OF SUSTAINABILITY?

Here's how:

1. Reach out directly to Sustainability Staff and submit resume and cover letter to indicate your interest
2. Get an understanding about current project opportunities that are available via an in-person meeting with Sustainability Staff
3. Get matched to a project by Sustainability Staff
4. Receive a permission number to enroll in the course by the add deadline from Sustainability Staff
5. Develop a workplan with your assigned mentor

*Note: Even though your adviser might suggest you work with the Sustainability Office for your internship, you still need to directly interface with Sustainability Staff before enrolling. Also, your adviser/professor should not give you a permission number to do your internship with the Office of Sustainability, instead you will need to receive this info from the Office directly.
